NWSAmarillo

weather.gov/ama

Some severe thunderstorms will be possible after midnight, mainly for the north to northeastern portions of the combined Panhandles. Hail will be the main threat, with wind gusts up to 60 mph still possible.

Hazardous Weather

Another Warm Day Ahead

Isolated severe thunderstorms possible late this afternoon east of the dryline

Weather Forecast Office
Lubbock, TX
Issued May 26, 2021 3:17 AM CDT

Isolated severe thunderstorms may develop along the dryline late this afternoon. Otherwise, partly cloudy skies and highs around 90 degrees are expected.

Severe Storms Possible This Evening

Otherwise, partly cloudy with lows mostly in the 60s

Weather Forecast Office
Lubbock, TX
Issued May 26, 2021 3:22 AM CDT

Isolated to scattered severe thunderstorms will be possible through the evening hours working west to east across the I-27 corridor. Otherwise, expect partly cloudy skies and lows mainly in the 60s.

Hazardous Weather

Severe Weather Day 1-2

When: Today and Thursday

Weather Forecast Office
Midland/Odessa, TX
Issued May 26, 2021 9:45 PM CT

A slight risk is in effect for possible severe weather along a dryline today and Thursday.

Much Lower Rain Chances Today

Weather Forecast Office
Fort Worth, TX

Issued May 26, 2021 3:42 AM CDT

Today's rain chances will likely remain confined to areas east of I-35, where the better moisture will reside. Afternoon pop-up showers and storms should remain fairly isolated in nature. If a storm does develop, the main threats will be lightning and gusty winds. High temperatures today will be in the mid 80s.

Hazardous Weather

Very warm today with the majority of the region remaining rain free. Isolated showers and thunderstorms are expected across the far southeastern counties. Highs range from the mid 80s in the Hill Country to the mid 90s along the Rio Grande.

Isolated showers and thunderstorms are expected this evening across most of south central Texas. Brief moderate to heavy rainfall along with occasional lightning strikes are possible. Most of the activity will likely decrease after midnight with the loss of daytime heating. It will be warm again with overnight lows in the upper 60s to mid 70s.

Hazardous Weather

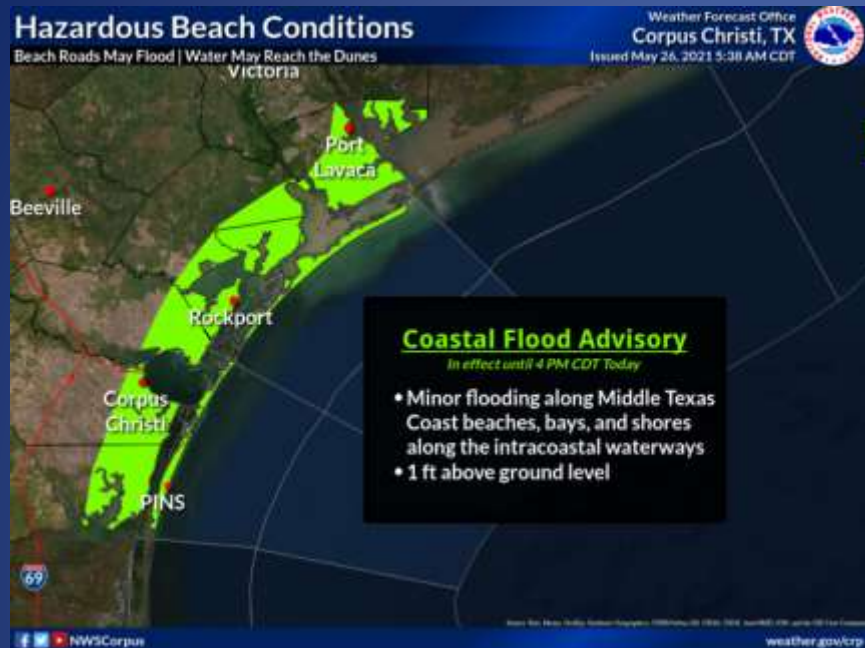

Forecast for today

High pressure over the gulf will keep skies partly sunny with a chance of some scattered rain and thunderstorms. Daytime high temps will push into the upper 80s for those inland and into the low 80s for the coastline. South to southeast winds 5 to 10 MPH.

Hazardous Weather

A Coastal Flood Advisory remains in effect today for the barrier islands, bays, and shores along the intracoastal waterways of the Middle Texas coast, for up to 1 ft of water inundation. Poor driving conditions are expected as water reaches the dunes, mainly near times of high tide.

Isolated to scattered showers and thunderstorms possible along the coast. Mostly cloudy conditions inland with highs in the mid to upper 90's for Deep South Texas today.

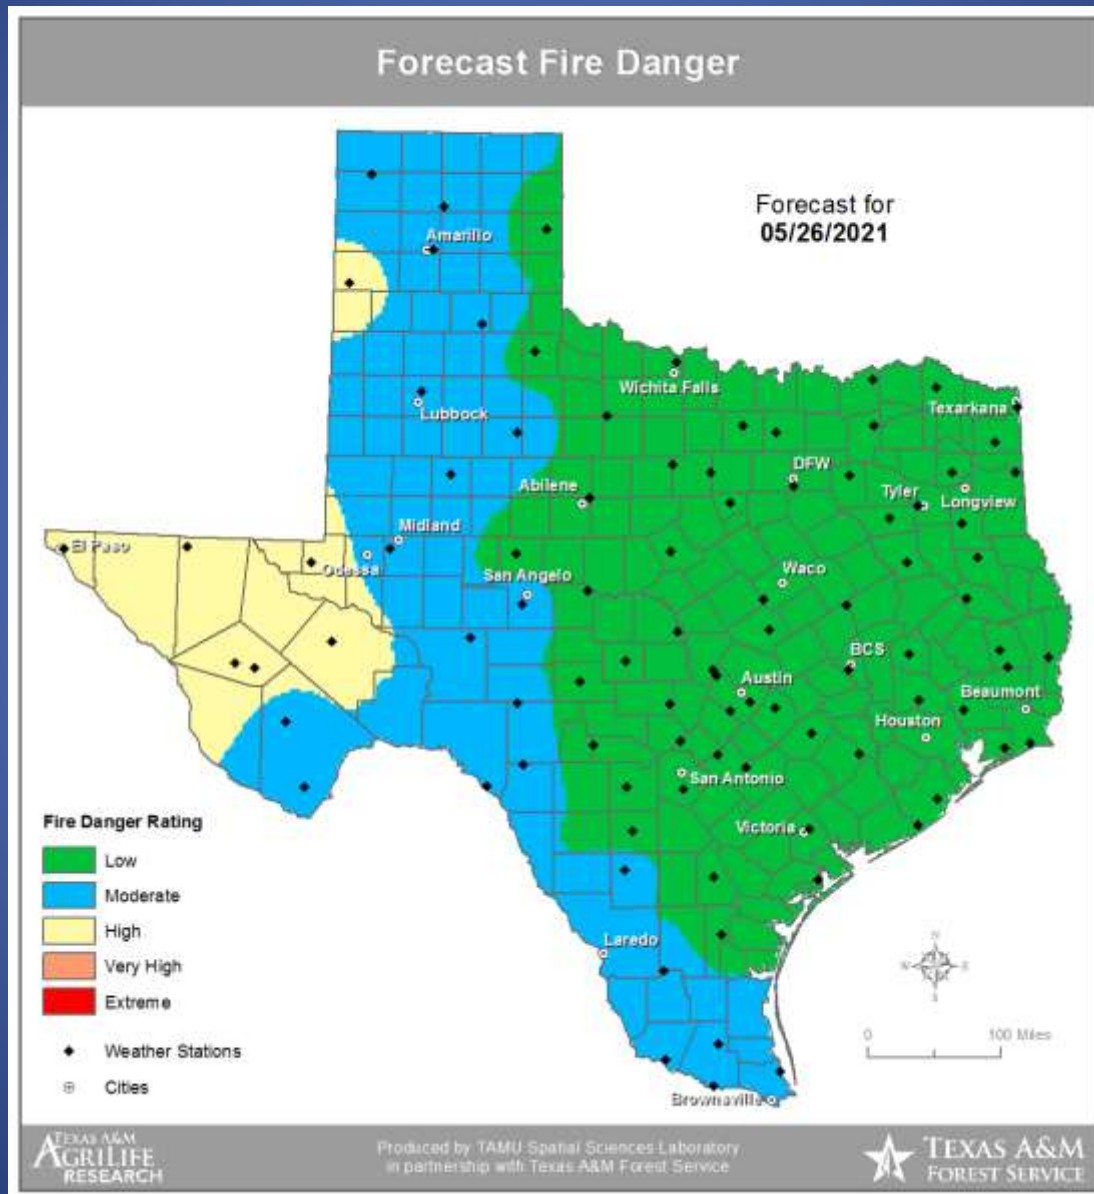

Weather Warnings/Advisories Issued

DATE	WARNING TYPE	LOCATION
05/25/21	Flash Flood Warning	Borden, Pecos, Scurry and Taylor Counties
